SUMMARY KEYWORDS

teachers, students, heartwarming, great, rewarding, work, blown, requested, skeptical, beneficial, cell, rewards, worth, year, inspired

00:01

We were so inspired. And I can tell you, the teachers were so inspired by what they saw. And students really rose to the challenge. And last year, teachers were skeptical. They didn't know how much work was going to be involved. You know how this would run, but I'm telling you, at the end of it, we were we were blown away. We were like, wow. And this year, everybody said, are we doing YPI? Again, it's not YPI is not a sell for me anymore. It may be last year was a sell, a little bit for the teachers, but now it's being requested. And people want to do it, everyone's jumping on board with it. This YPI is not just a great opportunity for students, it's a great opportunity for for teachers to it's not just beneficial for students. It's beneficial for teachers too, because you are seeing students do really amazing and positive things. One of the greatest rewards is seeing students do some amazing work. And so this allows us to see students doing great work, which, to me is heartwarming, and it makes it all worth it. And that's the rewarding part of our job.
